PEOPLE PLAY A VITAL PART IN OUR FOREST FIRE PROBLEMS

A review of the 1953 fire season proves the vital part people play in the never ending battle to prevent forest fires.

In this fire district there were 133 fires in 26 of the district's 30 towns; 409 acres were burned over and it cost $9,499.97 to extinguish them. This figure was reduced somewhat through payment of fire costs by persons responsible for illegal fires, fires which escaped from control and fires caused by their carelessness. Costs were abnormally high this year due to protracted periods of dry weather which increased the difficulty of extinguishing fires.

Eighty-eight percent of the 133 fires were man-caused and could have been prevented. They tell a story which needs to be carefully studied. Some people were careless in disposing of smoking material and camp fires; others burned without the required warden permit — disregarding weather, forest conditions and the normal safeguards recognized and considered by the warden in issuing permits. Other fires resulted from children playing with matches, carelessly handled fireworks, faulty railroad and truck equipment, etc.

These fires cost a lot to extinguish, most of which could have been avoided — this affects taxes; local business was interrupted by men leaving their jobs to extinguish the fires; trees that might otherwise have built houses, repaired bridges and supplied raw materials for local industries were destroyed; seedling growth — the future timber crop was wiped out.

This picture can, however, be reversed if people who offend could be impressed with the importance of

observing the simple but essential common sense safeguards that will prevent forest fires. They are:

1. Care in disposing of lighted cigars, cigarettes and matches in and near woodlands.

2. Care in selecting camp fire sites and completely extinguishing them.

3. Consultation with the local forest fire warden before burning to secure the required permit.

People play a vital part in our forest fire problem. It is EVERYONE'S job to HELP PREVENT FOREST FIRES.

District Fire Chief

The above enrollment figures do not include possible decreases due to families moving out of town. Nor does it include youngsters who drop out to go to work because of economic reasons or lack of interest in school. I might add that our dropout figures for the latter cause are extremely low; running about two percent.

The figures do not include any possible increase in school population due to increased housing construction, and a trend for Hopkinton to become a residential community for people who are employed in Concord. The growth of the machine shop may also possibly affect the rate of population growth.

We probably can conclude that, if the present trend continues, our school population is going to be even larger than these projected figures indicate. Even with our present enrollment and the number of children five years and under we are going to have a sizeable increase. The two right hand columns indicate what the enrollment is going to be in the New School Building for the next ten years.

As this enrollment increases it will eventually mean more teachers and more classrooms. For example, the present first grade with 45 pupils in two schools will combine as a single class in the new building in 1957. This is really too large a group for one teacher and yet the chances are that the class will be bigger rather than smaller by that time. This will certainly be too big for seventh and eighth grades and the compulsory subjects such as English, Civics and United States History.

You will probably recall that there was some question about the need of our New School building and it was explained that this building was needed to relieve congestion in both the high school and the elementary school. It was also stated that the best solution was to

build an elementary school building and a high school building but that we could not afford it. Perhaps the solution to the present problem would be to build an elementary building and move the fifth and sixth grade from their present location to an elementary school where they belong. Fifth and sixth grade children are of an age when they would be better working and playing with younger children.

With the growth of the town and increased school population, we must expect the costs of education to increase in Hopkinton even if the other factors remain the same, which they are not. How these factors will affect the tax is problematical. Increased enrollment does increase the costs. On the other hand, the construction of new residences will tend to reduce the tax rate. It is possible that one may offset the other.

There is no question but what we are operating a more efficient program, both educationally and financially. For the school year 1945-1946, the State Average Cost of Instruction for High School pupils was $123.79, while the cost for Hopkinton was $186.18. In 1950 the method of figuring costs was changed. Under the old system, to get the 1945-1946 average costs, the only expenses included were those listed in the budget under Instruction. In 1950, all the current operating expenses of the high school were added. This included Administrative Costs, Operation and Maintenance of School Plants, Auxiliary Activities, and Fixed Charges. Therefore, in 1950, we had a big jump in the figures of high school costs. For that year, the Average Cost in the state for high school pupils, was $259.87 as compared to $287.59 for Hopkinton. The State Average Cost for 1952-1953 has not been announced but it has been estimated that it will be about $310.00 per pupil. The average cost for Hopkinton was about $255.00 per high school pupil.

I won't go into detail on the change in educational

efficiency. Mr. Milne is going to mention that in his report.

The larger we grow the more varied program we will be able to offer and the better we will be meeting the needs of our children. Certainly a teacher can do better work with twenty-five or thirty pupils in the fourth grade than she could with forty-seven pupils in grades three and four combined; such as we had last year.

Hopkinton will be having growing pains for some time which presents a challenge to the community, the school board, and the teachers. We have made tremendous strides in the past few years due to an alert and well informed community and conscientious hard working school boards. I am sure that Hopkinton will meet these problems and continue to improve our educational program.

If Better Schools mean Better Communities, and I am sure it does, then it also follows that Better Communities mean Better Schools.

In 1954-55 we shall add Typing II and Stenography to the Business Course. There will also be added a course in Review Mathematics designed primarily for those seniors who have had no mathematics during their high school career.

Two new teachers have been added to the faculty this year — Miss Gloria Jackson, a graduate of Keene Teachers College, and Miss Ellen McClintock, a graduate of Plymouth Teachers College. Miss Jackson is teaching English and Social Studies and Miss McClintock is teaching the Business Course.

This year the Business Course was added to our Program of Studies. Because of the demand, it was necessary to run four sections of typing so that everyone who so desired might avail himself of the opportunity to learn to type. Each year we shall add to the Business Course so that in two years time we shall have a four-year Business Course.

This year, in order to better meet the individual needs of our students, we have two groups in U. S. History, Human Behavior, and English. At the beginning of the year, Grades 11 & 12 were put together in one group and then this one group was divided into two sections — a college preparatory and a non-college preparatory group. The basis for division, in most cases, was the results of the student's Cooperative Reading Test which is administered each year by the University of New Hampshire Testing Service to the ninth and eleventh grades. In this way, students who are not planning to further their education can be given a more practical type of History, English, and Human Behavior. On the other hand, the college preparatory group can be given work, especially of a research nature, which will prove invaluable in preparing them to further their education. The results have been quite satisfactory.

This division of a group into two or more sections

has not been confined to the above-mentioned subjects but is the practice in most classes. It is one way of meeting the individual differences of pupils.

The increase in our school population has caused a considerable increase in the number of students participating in our Hot Lunch Program. At present, the daily average of meals being served is about 265. This necessitated a change in the time when meals are served. The 5th and 6th grade pupils eat at 11:30, grades 1-4 come in at 11:45, and grades 7-12 arrive at 12 noon. It is expected that in the not too distant future it will be necessary for grades 7-12 to eat in two shifts in order to relieve any possible congestion. A vote of thanks is to be given to Mrs. Dorothy French and her able assistants who have provided such excellent meals.

In closing, I wish to thank all those parents and friends who have helped us to make this past year successful.

Respectfully submitted,

WILLIAM H. MILNE,

Principal
